

# Project: "A place for everybody"

[www.riminiprovinciaccessibile.it](http://www.riminiprovinciaccessibile.it)

Hospitality means to guide all the people who are searching for their own destination.

The aim of this website is to inform the guests with disabilities or with special needs (for instance elderly people) about the accommodation, the main tourist attractions, beaches and entertainment that the city of Rimini and its surroundings have to offer.

A group of experts made up of specialists, people with disabilities and representatives of voluntary associations has joined this initiative in order to gather detailed information about welcome services for people with disabilities regarding bedroom and bathroom furnishings, the ramp slopes, the width of the doors and the lifts, etc. The data is recorded by means of a form created following the C.A.R.E. guidelines (Accessible Cities of European Regions).

Since every person with disabilities has his specific difficulties and special needs, it is essential to give the possibility to verify accurately if there are facilities suited for his own requirements in order to optimize the tourist welcome and to guarantee a higher satisfaction of the guests.

Moreover the project checks up the accessibility of urban routes linking the main points of interest as well as connection services (hotel-equipped lido, hotel-public transports, hotel-shops, restaurants, hotel-monuments and city center) and suggests the administrative organizations concerned to demolish the existing barriers to make the entire holiday a positive and fulfilling experience.

"A place for everybody" is an occasion as a project to contribute to the city tourist offer with a particular attention to the requirements of people with disabilities or with special needs (such as elderly people) thanks to a new approach that enhances the positive sides and the strengths that are to be found in this area.
